If you do decide to use Robinhood, we recommend an additional source for news and technical analysis. Robinhood lacks in the customer service department. Brokerage account holders have no way to contact the company by phone or through live chat. Currently, the only way you can get in contact with Robinhood's customer service team is by submitting a complaint form through the brokerage's contact Us button. The only other way to contact Robinhood is via social media. The Twitter account Robinhood Support offers limited assistance if you're logged into a Twitter account. One of Robinhood's strongest assets is its mobile app. Like the desktop platform, Robinhood's mobile app is streamlined, so even new traders can quickly buy and sell on the go. Some of our favorite features of Robinhood's mobile app include: Simple order placement: Placing a buy or sell order and finally enter the number of stocks. Then, swipe up — Robinhood will confirm your order has been placed and send you an email when and if your order has been executed. Simple, effective and perfect for quick trades, the Robinhood app is easy to master. Daily news feed updates: Robinhood updates its news feed with daily articles on the stocks you own or are watching. Swipe through the day's news offerings to learn more about market movements and inform your trades. Swipe, tap and flick through news articles to read more about the assets you own. Variety of safety features: You can enable standard two-factor authentication, which requires a unique code to be entered from one of your linked contact methods every time you use your account. You can also enable PIN access, which requires you to enter a 6-digit PIN each time you open the app. Robinhood's app is comprehensive and intuitive, allowing traders the full functionality they expect from the broker's desktop platform. The Robinhood app even improves on the desktop platform in a number of areas — for example, easy candlestick charting and a fun swipe-to-order feature. Robinhood app even improves on the desktop platform in a number of areas — for example, easy candlestick charting and a fun swipe-to-order feature. Robinhood is a brokerage built for beginners. If you've never traded before, you'll likely find that Robinhood is quick to master and easy to operate. However, the brokerage's focus on streamlining means that you'll miss out on some charting and analysis tools common among competing brokers. If you're looking for in-depth technical analysis or a stock screener, you won't find it through Robinhood. If you already know what you'd like to buy and sell, you'll love the brokerage's simple and intuitive order system. Robinhood's claim to fame is its \$0 commissions, which led to its rise in popularity. However, as more and more brokerages follow Robinhood's lead and switch to \$0 fee structures, the company has lost some shine. With no access to futures, forex or even mutual funds, many traders will be disappointed with Robinhood's offerings. You can't even open an IRA through Robinhood? The answer depends on your skill level and needs as a trader. If you're a frequent and active trader who needs a wide swatch of trading tools, Robinhood isn't for you. However, if you're a new trader overwhelmed by larger brokerages, Robinhood's simplicity and clean design can be a comfortable way to dip your toes into investing waters. Is Robinhood Good for Crypto? There are 17 cryptocurrencies currently available on the Robinhood platform. More notably, they are one of the few platforms that allow buying and selling of Dogecoin (DOGE). However, as of this publication, they have implemented restrictions on some assets. If you're looking for alternatives to Robinhood, you can find a list here. Frequently Asked Questions 1 What do you need to meet the following requirements: Be 18 years or older.
